291 ably it was of wildcat skin which was not split. In donning the garment, it was folded over the belt at the back, the belt being pulled tight and tied in front. As the clout hung thus at the back, the inner flap was about two-thirds the length of the outer. The outer, longer length (the clout proper, so to say) was pulled forward between the legs and forced up under the tied belt. There was sufficient length for the front end to hang in a flap of about 6 to [281] 10 inches. Wildcat skins did not allow for so long an inner length at the back, though this always had to come well under the buttocks or the clout would loosen and pull out at the back when the wearer stooped or sat. Powers states [834] that the breechclout was not removed during bathing, but none of my informants made any such claims to modesty.[159]

Men's dress.--It was not unusual for men to go entirely naked at any time. A loincloth [281] of deerskin (sep) is mentioned by Kroeber;[160] my informants spoke of its use on dress occasions but not as a daily garment.

283 The belt was of milkweed string woven
291 ("sewn") in the same manner as the burden band (fig. 13, c-f). This belt was 35 to 40 inches long, which allowed some 6 inches to hang down [304] after it was knotted. A belt for special dress had small beads (koi´koi) inserted in its strands and was called koikoi´'ič (fig. 13, g).
291 Today all such belts are woven on the bow loom
294 which was perhaps diffused through Spanish in-
286 fluence. A belt of milkweed fibre and red wool, woven on the bow loom but old style in effect, was worn by a Chukchansi informant.

291 A sandal (daki´'ič) of thick hide, deer
294 neck or bearskin, was worn by men during very hot weather or when making a long journey.
281 Several layers of hide were cut to the foot pattern, then slit at proper points, and binding thongs were inserted. Then the bottom or "sole" layer was added and all sewed together with sinew. Holes were punched along the edges with a fine, sharp, deer bone awl. The sewing was around the outside. Informants disagree on the position of the binding thongs.

291 Sandals were not worn by women. No type of fibre sandal was known. Powers mentions
281 sandals but does not describe them beyond saying that they were "very rude" and that elkhide was preferred. Kroeber speaks of "rude sandals of bear fur" which were used in winter. The statement by a knowledgeable pioneer that no foot covering of any sort was worn and that there was no Yokuts word for such an object is unquestionably an overstatement; yet it serves to emphasize the scarcity of footgear.[161]

[439] Moccasins were bought from the Eastern Mono. The attempts by informants to describe

276 A short-lived pipe of elderwood could be quickly made by removing the pith, work of a few moments. There are no wooden pipes about [764] today, said N.W., because a man's possessions were always burned at his death.

276 N.W. has a pipe, which Thrall could not positively identify as of clay or of soapstone. 323 Its weight was in favor of clay, as was its 324 form and appearance: N.W. contended that it was soapstone, which in the past was used for pipes more than wood. N.W. found the pipe in the garden of her present home at Picayune; it lay under an apple tree; at first glance she "thought it was a big acorn."

Thrall concluded it was pottery, saying: "The pipe looks as if made of clay, by the process described in Gayton's pottery-making paper. It is brown-gray in color -- dark gray with a brownish tinge on smooth parts of the surface, slightly reddish brown on one side." Claiming that it was of soft stone like the cooking stones, N.W. said Lillian's great-grandmother, who was a Chukchansi and lived in this neighborhood, used to make stone pipes. She said the stone became hard after being fired: that it was allowed to "cook" a long time. N.W. called tobacco ba''om, the pipe ʒokut.

276 Cigarettes were in common evidence by the early 1870's, at least on important occasions.[117]

262 Gum.---Green milkweed plants were pulled up and the leaves stripped off, said J.R. This caused the milklike fluid to run down the stalk. The stripper held a lump of mud in his hand and, rubbing this, up and down the stalk, collected the gummy juice. When enough had been accumulated, the lump was immersed in a spring or creek, where the sticky juice clung together and the mud dissolved and washed away. The lump of gum was chewed for pleasure, like modern chewing gum.

LIFE CYCLE

Birth and Infancy

842 "Some people would have children right away after marrying and some would wait longer. Some people would wait for years," said N.W.[118]

847 One abortive, so-called, was known. A woman who did not want an offspring would drink 278 a decoction of boiled mistletoe. It was bitter. This killed the embryo, or perhaps was thought to cause sterility, for the informant claimed "nothing came out" as a result of drinking the

[834] [118] If this means that some couples voluntarily denied 171 themselves sexual relations, it is significant as being similar to a practice of the Yumans and Eastern Mono (Forde, Ethnography of the Yuma Indians, 156; Steward, Panatübiji, 187); there is no hint of unnatural sex abstention from Yokuts to the south. -- A.H.G.

ers, four of them caper around like clowns in a circus, chasing each other, chanting, brandishing rattlesnakes in their hands, twining them about their arms, and suffering them to bite their hands. It is supposed that they have either plucked their fangs, or have not allowed them to drink any water for a number of days beforehand, which is said to render them harmless. But the credulous savages believe them invulnerable, and they eagerly press forward with their offerings, in return for which the wizards give them complete immunity from snake-bites for the space of a year. The younger Indians, somewhat indoctrinated in American ideas, have become sadly skeptical and heretical in regard of these dances, which they contemptuously term "skunk meetings", to the great scandal of their pious elders.

Formerly the step danced by the men on most occasions might not inappropriately be called the piston-rod dance, as they seemed intent on driving their legs alternately into the earth. Of late they have adopted from the Mono the grand walk-round, in a single circle, men and women together, and with an entirely different and less violent step.

Although they have a form of war-dance, and the Chukchansi warred a great deal with the Pohonichi of old, as a race they are peaceful, and they take no scalps. But of late years, under the aggravation of aggressions by white men, they have adopted from the warlike Mono the red paint (instead of black), which has so terrible a significance in a savage dance, and the appearance of which always makes the frontiersmen uneasy. From them, also, they have learned to talk of war, to bluster, to threaten darkly, to hold secret conclaves far within the depths of the mountains, from which the whites were rigidly excluded. But nothing has come of them. These things are foreign to the peaceful Yokuts, and the Monos, though they are supposed to have attempted it many times, have never succeeded in screwing their neighbors' courage up to the sticking-point of joining them in a war on the whites.

Nowadays $20 or $30 in gold is paid for a wife, but this only for a virgin. For a widow or a maid suspected of unchastity no man will pay anything or make any presents; and it is due to the Yokuts to state that a pioneer who has lived among them twenty-one years affirms that before the arrival of the Americans they were comparatively virtuous. Dr. E. R Bate-

834 man, physician to the Tule River Reservation, gives me the information that both males and females, though bathing quite apart, never enter the water without wearing breech-cloths at least; and this is corroborated by an old resident on King's River, who observed it of them in their native condition. 837 [81] Mr. Charles Maltby, agent of the above reservation, and at one time Indian agent for the whole State, and well acquainted with aboriginal habits, also affirms that the Yokuts are purer than the northern tribes, and [648] that the Indians throughout Southern California are less given to the infamous practice of selling the virtue of their women to white men than those of Northern California. They may not have been any better originally, but they have not been so shamefully debauched by miners. That is probably the explanation.

192 Their language has what is generally considered a good indication, 834 separate words for "woman" (*mo-kel'-la*), and wife (*mo-ki'*); also, for "man" (*no'-no*) and "husband" (*lo'-wit*).

541 We find also the singular custom noticed in some other tribes, that a man marrying goes to live at his wife's or father-in-law's house, though he still has power of life or death over her person.

847 Infanticide is practiced in case of deformity.

Many years ago the Indians dwelling on the lake at the mouth of King's 648 River were carried away captives by the Spaniards, and taken to San Luis 567 Obispo. After a long residence there, upon the breaking up of the missions, they returned to their native land; but meantime a new generation had grown up, to whom the old mission was their home. They yearned to return, and to this day they make an annual pilgrimage to San Luis, where they remain a month; and they would by preference live there all their remaining days, only their children, born on the shores of Tulare Lake, will not consent. By some this may be considered a convincing proof of their attachment to the old Jesuit padres, who used to lasso them in the name of the church; but it is not necessary to resort to this explanation at all. It is easily enough accounted for by the California Indian's proverbial love of his birthplace, just as the slave-born children of Israel lusted for the flesh-pots of that Egypt which had scourged them.

764 494 If an Indian dies on a trail far from home he is buried beside it. Every
